1.WB- Once upon a time, there was a little boy who dreamt of studying abroad. He grew up in a small home, at the edge of the city of Hyderabad. While both his parent worked hard everyday to put food on the table for 5, he worked as hard to be at the top of his school. He topped the 12th grade in mathematics and physics, and then went on to pursue higher studies. [Link to facebook photo \(comment\)](#)

3. WB- After graduating college he went on to hunt for a study abroad for his masters. Back there was no internet, and without internet there was no easy way of researching colleges or getting applications. He mailed to several universities, hoping for a pre-application mail from at least one of them. At that time, it was very hard for Indians to study in the US and obtain a Visa because of the difficult political relationship between the two countries. A couple of universities responded, offering him a full ride to graduate school. [\(link to Instagram picture with comment to next link\)](#)

4. IN- There were many hardships to getting acceptance from these colleges, including the GRE test and the english test to qualify. Coming from a Telugu speaking school, he had not enough education in the English language. Marquette university responded with a full ride along with a Teaching assistant opportunity. 5. YT- He taught students after class as a TA to earn enough to support himself. He earned about 700 a month to pay for rent, groceries, a car, and saved some every month to be able to fly back home twice a year. After studying at Marquette for 2 years, he applied for jobs to get within the next 6 months, before his F1 visa expires. He found a great job within 4 months and they treated him well, and got him an H1 visa to be able to work in the country. He went back to

India to get married and brought his beautiful wife back to the states where they made a family and bought a house in the suburbs near Chicago. He worked so hard they made him Vice President of the company. (Link to google doc)

6. GD- After 8 years.. He resigned and moved on to the next part of his life. He started 2 consulting companies with his 2 friends. They worked in the company for a few years until the economy started to crash. The family stayed in the states for a couple of years till the kids grew to be 7 and 3 respectively. He sold his share of the company and they moved back home, to India. (Link to instagram)

7. IN- These kids grew up in a great home with hard working caring parents, went to great schools, visited some amazing countries and the best resources. When the older one was ready for college, she knew she was made for the design field. Her parents were extremely supportive and they worked to send her to the best design school no matter what it took. Her dreams came true and today here she is..... (Go to next post)

8. IN- This inspiring story is the story of my dad.
I am here today, because of him! (link TO GOOGLE MAPS FROM LOCATION OF IMAGE)
